Our black goods department lags not behind the times. In it is concentrated more of thought and effort than was in olden days given to the entire dress goods department. All the staples are well represented and every novelty—that deserves it—finds a place therein. We call for today special attention to

A great deal of complaint is made because of the filthy condition of some of the alleys in this place. Why wouldn't it be a good scheme to extend the regular Friday morning cleaning up to the rear as well as the front of the business places? We think the village would pay for the removal of the rubbish from the alleys as well as from the streets, and the cleaning up would add to the appearance, cleanliness and healthfulness of the village.

Considerable local interest has been manifested in the recent finding of Chicora wreckage along the lake shore, and especially in the finding of a floating bottle near Saugatuck containing what purported to be a message from Engineer McClure of the lost boat, saying they were disabled and about to sink almost in sight of land. This message is generally regarded as a "fake," perpetrated by some cruel practical joker.

Lawton is much worried, we should judge by reading the *Leader* and dispatches from that village to the daily papers, because Paw Paw business men insist that the traveling men who receive their patronage shall, occasionally at least, patronize a Paw Paw hotel or a Paw Paw lake line. It is even threatened that some of the festive drummers will not come to Paw Paw hereafter! Woeful calamity! We venture the assertion that every business man here and elsewhere would heave a sigh of relief if one-half these gentlemanly solicitors of trade were called off the road.

The following interesting item appeared in the Kalamazoo *News* yesterday. We know nothing concerning the truth or falsity of the report. "News comes from a reliable source, that the South Haven & Eastern narrow gauge line from Lawton to South Haven, has been sold to the Chicago and West Michigan company, which will take possession about June 1. The two railroads intersect at Hartford. The purchase means that the Chicago and West Michigan will have a new lake port, South Haven, and be enabled to do a good fruit business, while residents along the narrow gauge will have better train service—a thing for which they have long been contending."

Geo. L. Bruner is authority for the statement that a dam could be built across the river near the north bridge, making a pond to overflow "the flats" and furnishing a water power of at least 500-horse power, and that without interfering in the least with any rights of the owners of powers above. This matter is worth investigating. Such a power would be a big inducement for the location of manufacturing plants here—a fruit package factory, for instance, most of the product from which could be consumed at home and an enterprise with the success of which transportation facilities would make little difference. If Paw Paw can devise some way of getting something made here to ship out in quantities, some means will be provided for economical shipment.
